

Additional components

Additional parts have been added to your **RED** storage box.

Cables:

Additional 3,4,5,6,8 pin cables
Servo extension cables
RJ11 IR sensor cables

Parts:

Additional DC motor drive
Additional TOF sensors 1 x L0, 2 x L1
Serial TOF sensor
Additional ultrasound sensors
8 x 8 array TOF sensor
XY Sensor

Additional documentation and examples will be made available soon to help you with hooking up the new sensors.

Hardware:

Camera mount

During the competition it would be good to capture video from the point of view of the robot. Provided is a camera mount that can be placed on the robot, to allow quick connection and disconnection of the camera. There will be only 4 cameras available. Two for those robots currently in the arena, and 2 for those preparing to enter the arena. I know some of you have already designed your robots, so this is an optional feature that can be added to your if there is room.

Battery mount

The competition day battery will be slightly different height to the batteries currently in circulation. The provided battery holder allows for different sized batteries. The design of the holder allows for both vertical or horizontal mounting.

General Notes:

The plastic dummy weights should be stored at the front of the main lab and not in your storage box to allow an equal opportunity for all teams to access the plastic weights as there is a very limited number of these weights.

IMPORTANT NOTE

Batteries need to be stored in the designed battery storage area, and not in the robot storage cupboard. Currently about 20% of the class are forgetting to return the battery to the storage area.

Team or Robot Name

Your team should think of a team name or robot name. This will be used on the competition day. An online form will be made available in term 4 to allow you to enter a name.

Additional TOF Sensors
1 x L0, 2 x L1

Additional Ultrasound Sensors
2 x HC-SR04

Serial TOF Sensors

2nd DC Motor Drive

Battery Holder, Camera Mount

8 x 8 Array TOF Sensor I2C Mode
Part: DFRobot SEN0628

XY Sensor
PMW3901 Optical Flow Sensor

Camera Mount

Battery Mount
